

Hi im Daniel

Fossil fuel suck but your forced to rely on them in order to get the electricity you need

And renewable energy is often region specific or spotty

- Succinct description of the solution

So i have these prods which will collect the loose energy that just in the ground

- Why is it a good approach to the situation

,

Brainstorm potential questions that your audience may have (at least 3) and write out brief answers addressing those concerns or thoughts

Orchards

Forests

Emergency station

Doesnt harm the plants in the process

Plant-e

Be very extrmely specific
